

I/I Compliance Inspections: Contractor List/Choosing A Repair Method

Based on the conditions at your home (landscaping, retaining walls, and the cost to repair the street), you will need to decide whether it is more cost effective to repair your sewer service by having a contractor dig an open trench or use an approved alternative method. While some homeowners prefer sewer lining as an alternative

to open trench, the City provides no assurances for choosing one method over the other.

Plumbing contractors may obtain a sewer permit from the City if they hold a Minnesota Master Plumber License and a \$25,000 State Bond from the Minnesota Department of Labor and

Industry, or if they hold a Pipelayer's Card and a \$25,000 Unlicensed Contractor Bond from the Minnesota Department of Labor and Industry. In addition, all contractors must provide a Certificate of Insurance showing evidence of liability insurance and worker's compensation coverage (if there are employees).

Alternative Repair Methods

If the City approves use of an alternative sewer repair method, the following contractors have been certified by the materials manufacturers to do sewer lining and have submitted the appropriate documentation to the City:

- **A-Z Underground**
612-977-3023
5718 International Pkwy
New Hope, MN 55428
service@a-zunderground.com
